AIM

- Revolutionizing In-Store Shopping Experience

Problem:

Long checkout lines, difficulty finding products, inefficient shopping experience

Solution:

AI-powered Smart Cart with AR Navigation and Self-Checkout

Impact:

Enhanced customer satisfaction, reduced wait times, increased operational efficiency

Scope of the Project

- 📌 Improve shopping efficiency with AI and AR
- 📌 Enhance customer experience with real-time navigation and smart recommendations
- 📌 Enable seamless self-checkout with multiple payment options
- 📌 Provide store analytics for inventory and sales optimization

Modules

1. AR Navigation System
2. Smart Scanning & Cart Management
3. AI-Powered Recommendations
4. Seamless Checkout Experience

MARKET

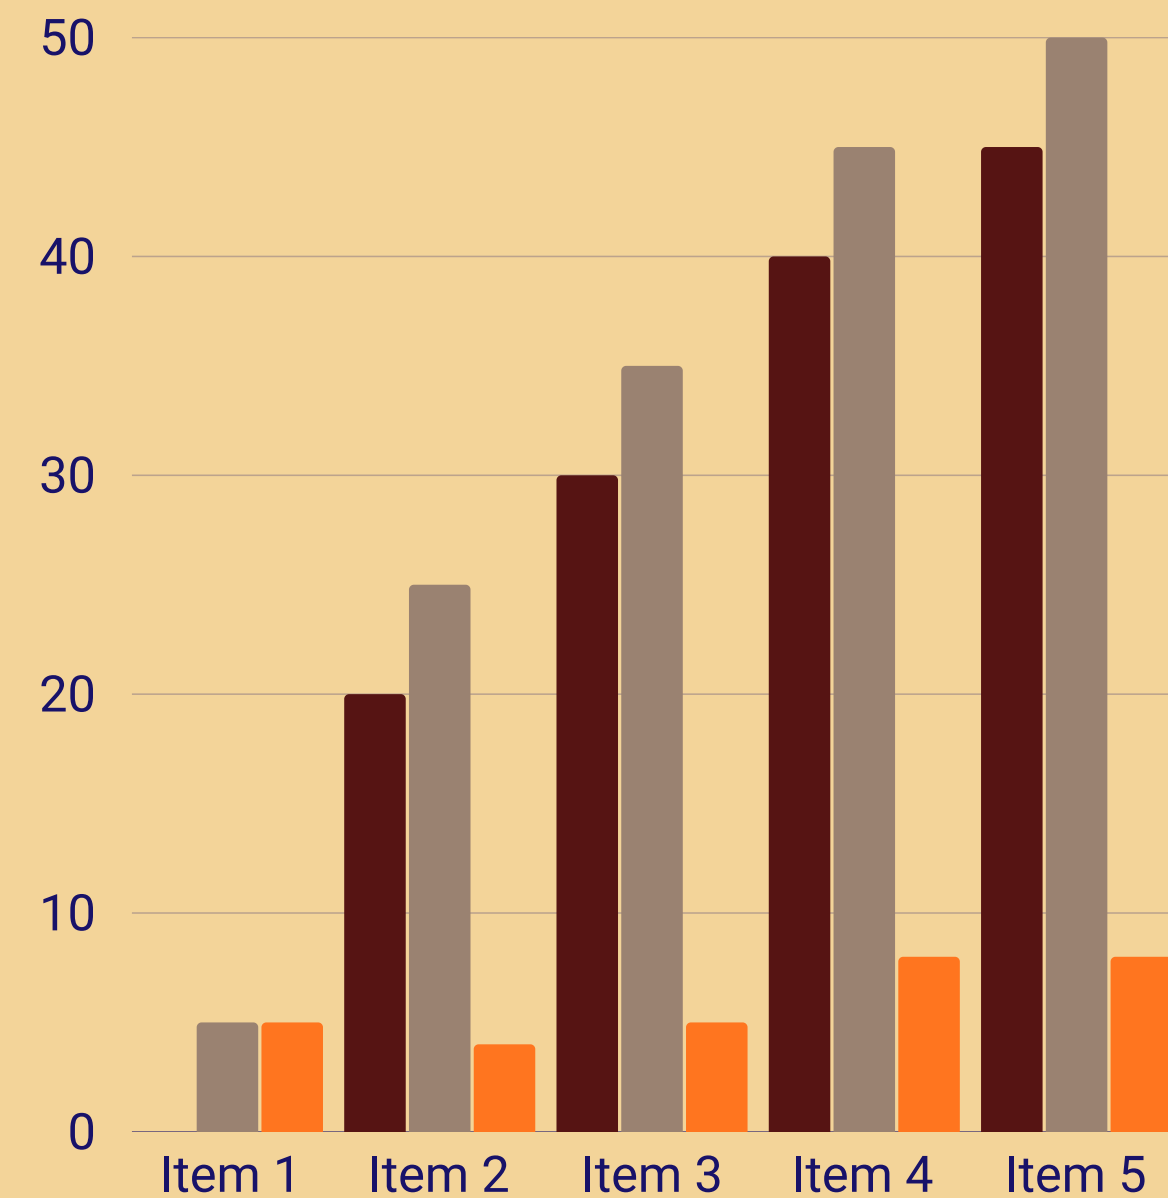

SYSTEM ARCHITECTURE

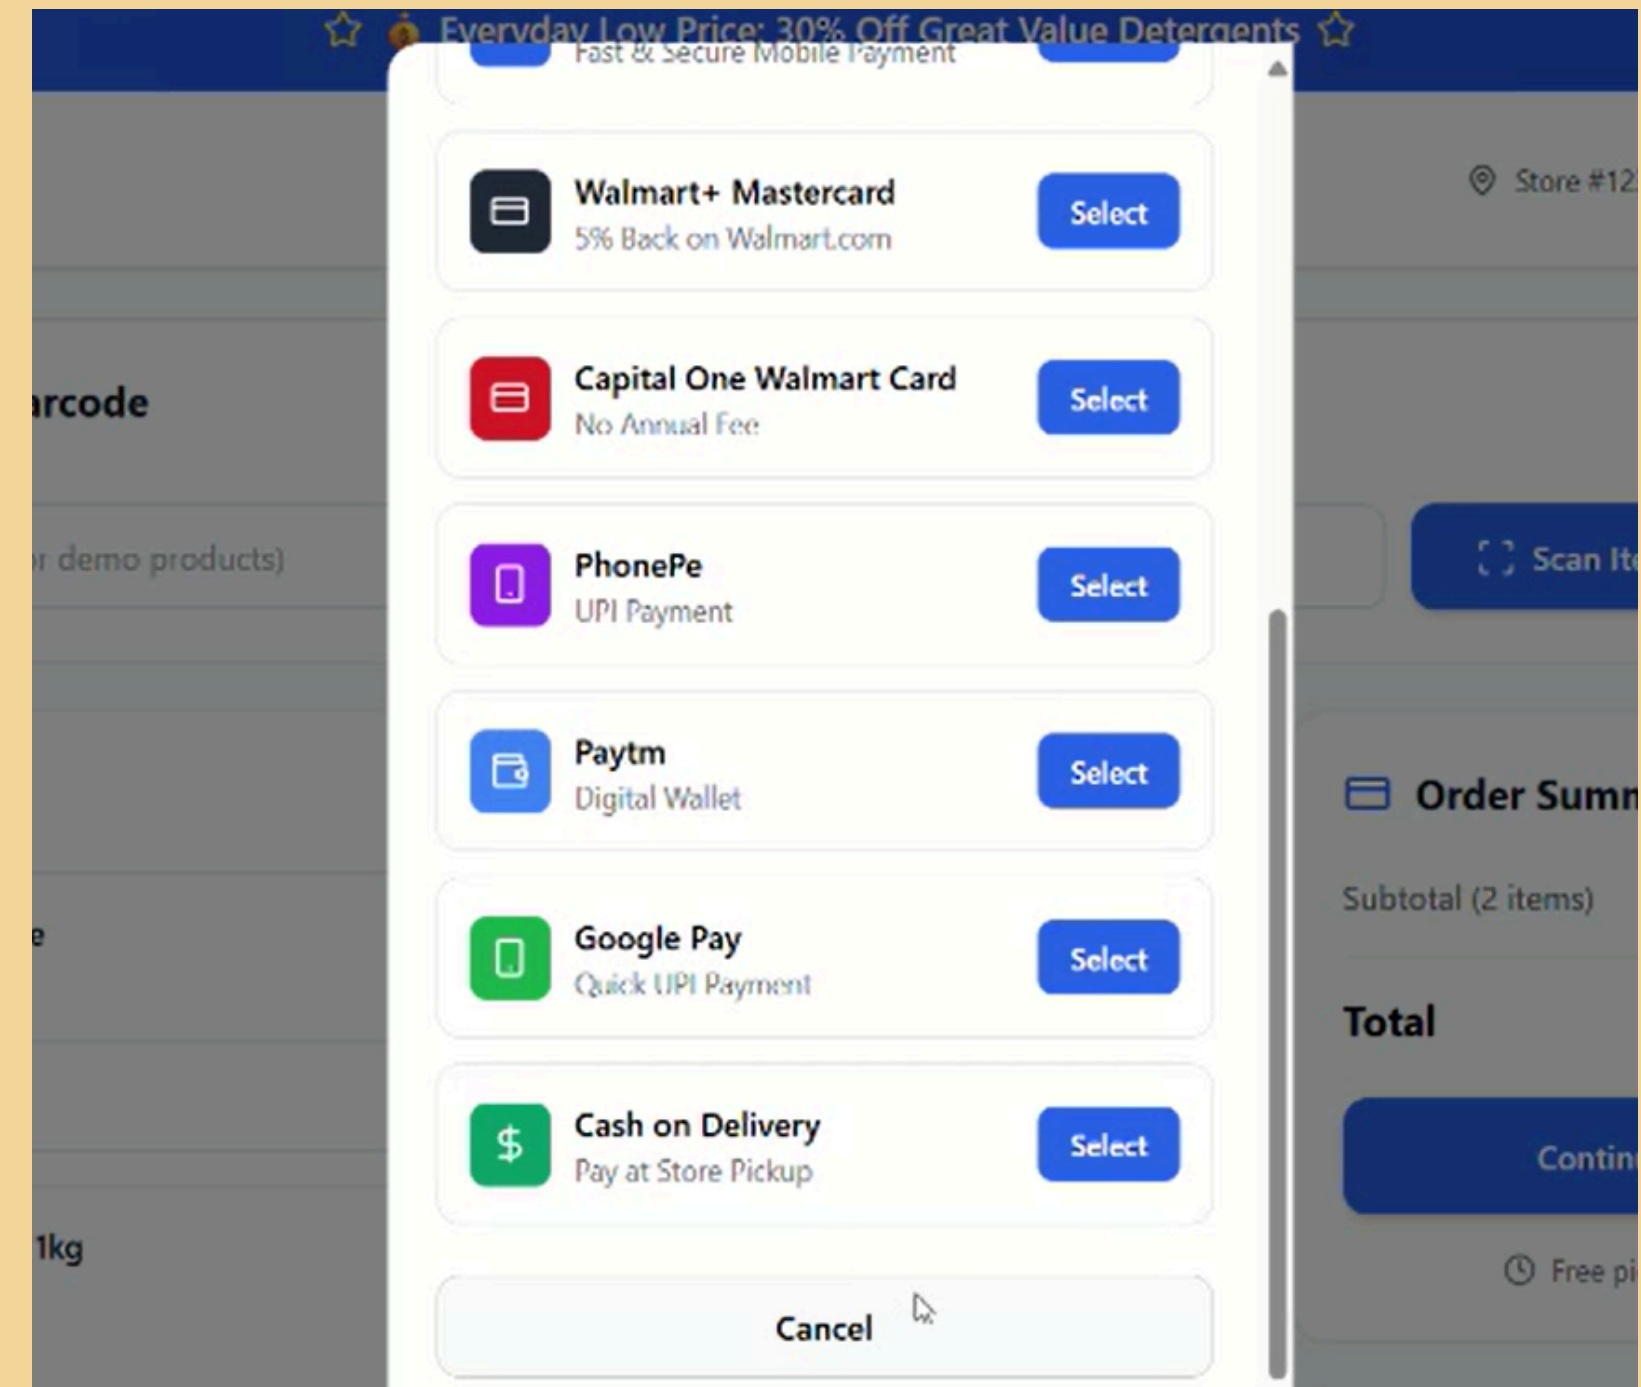

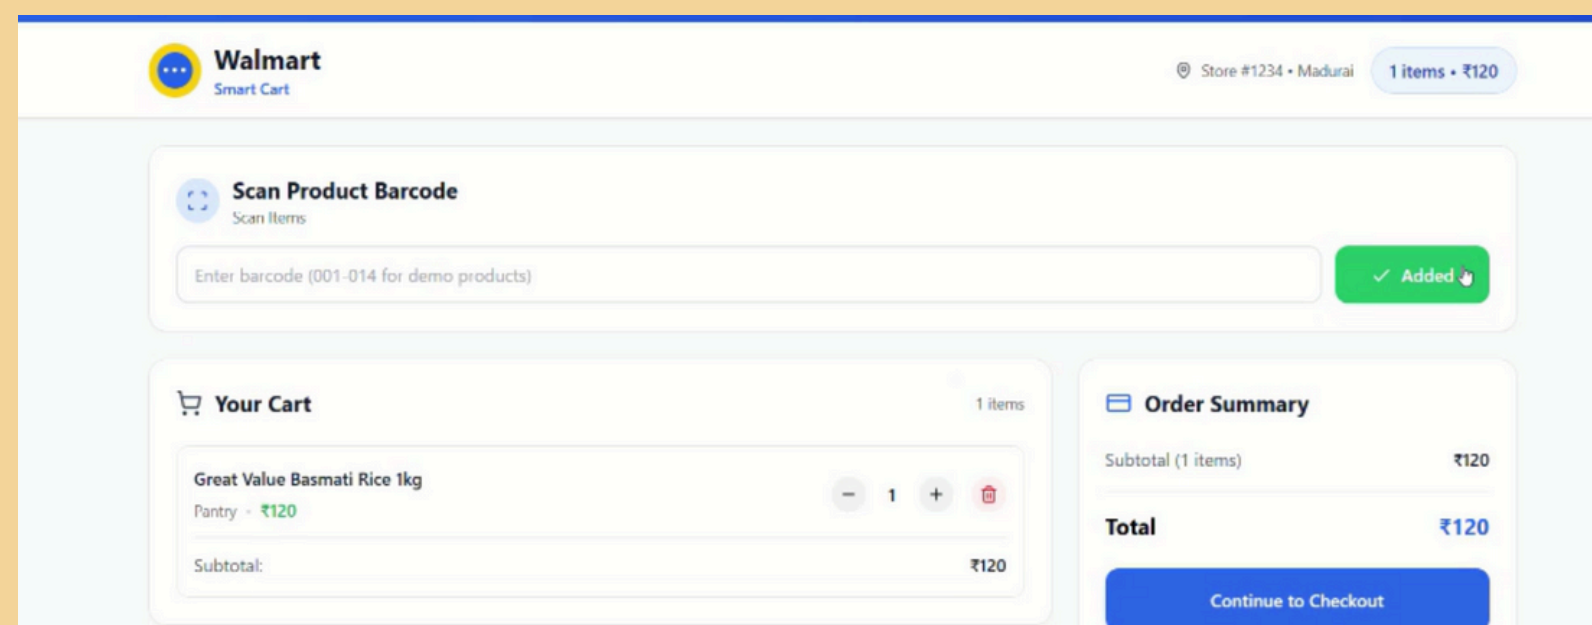

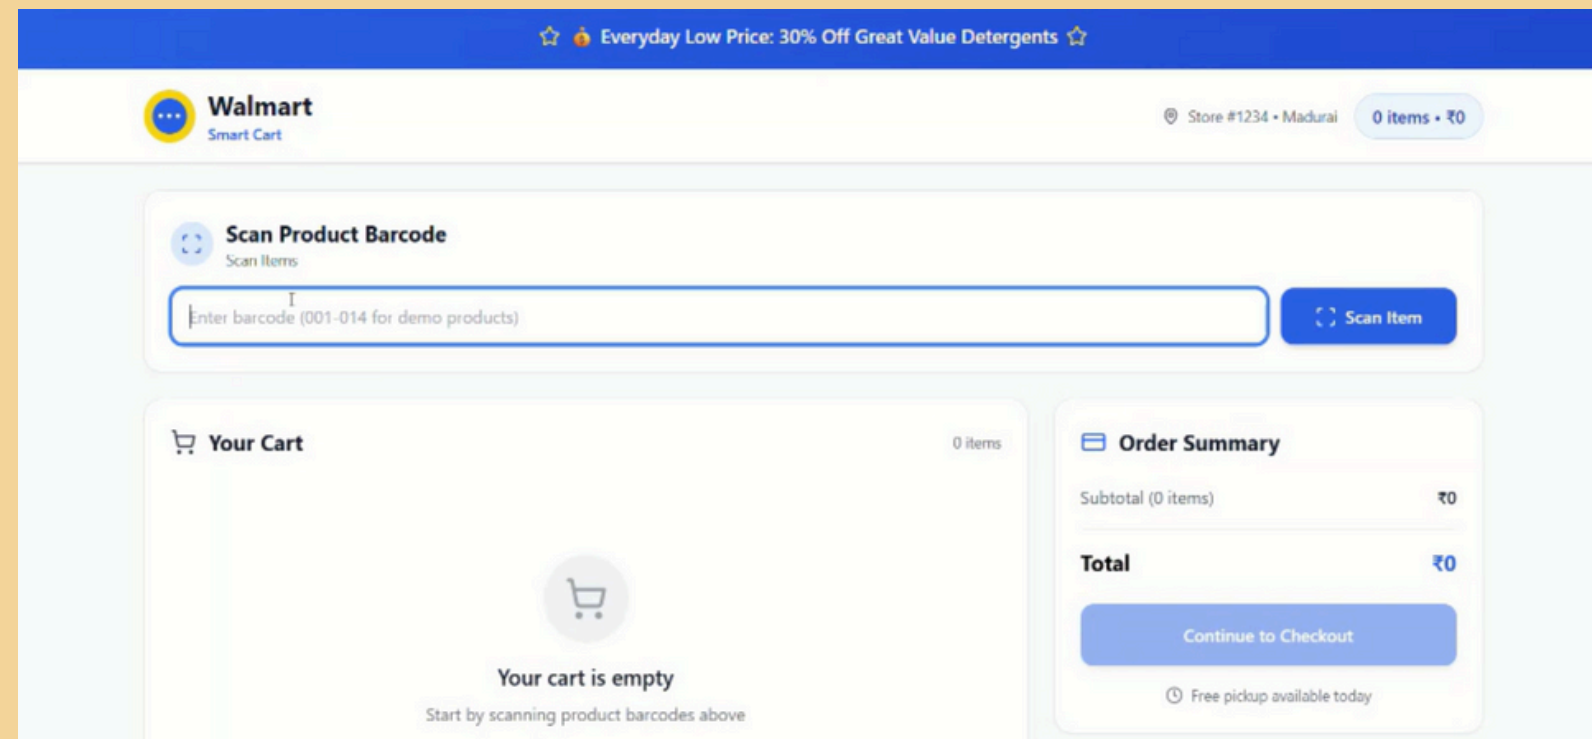

STATUS OF THE PROJECT

Implemented Features:

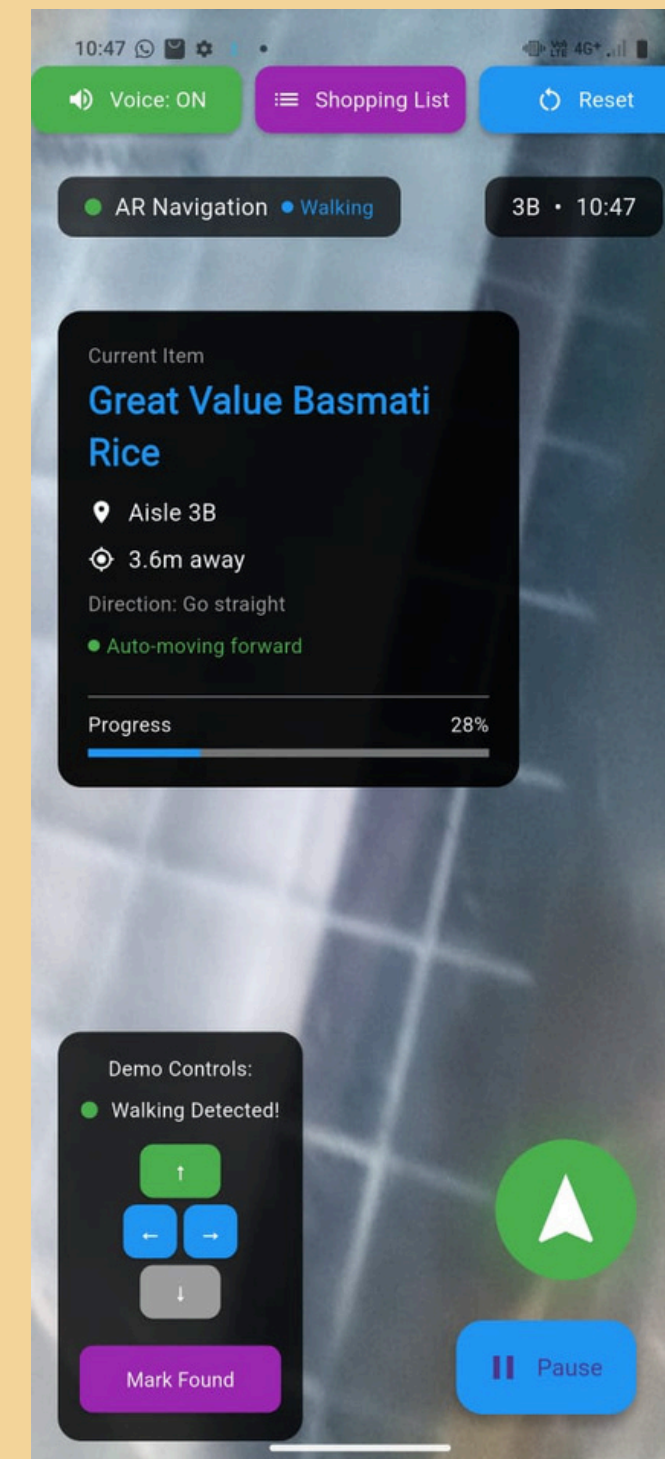

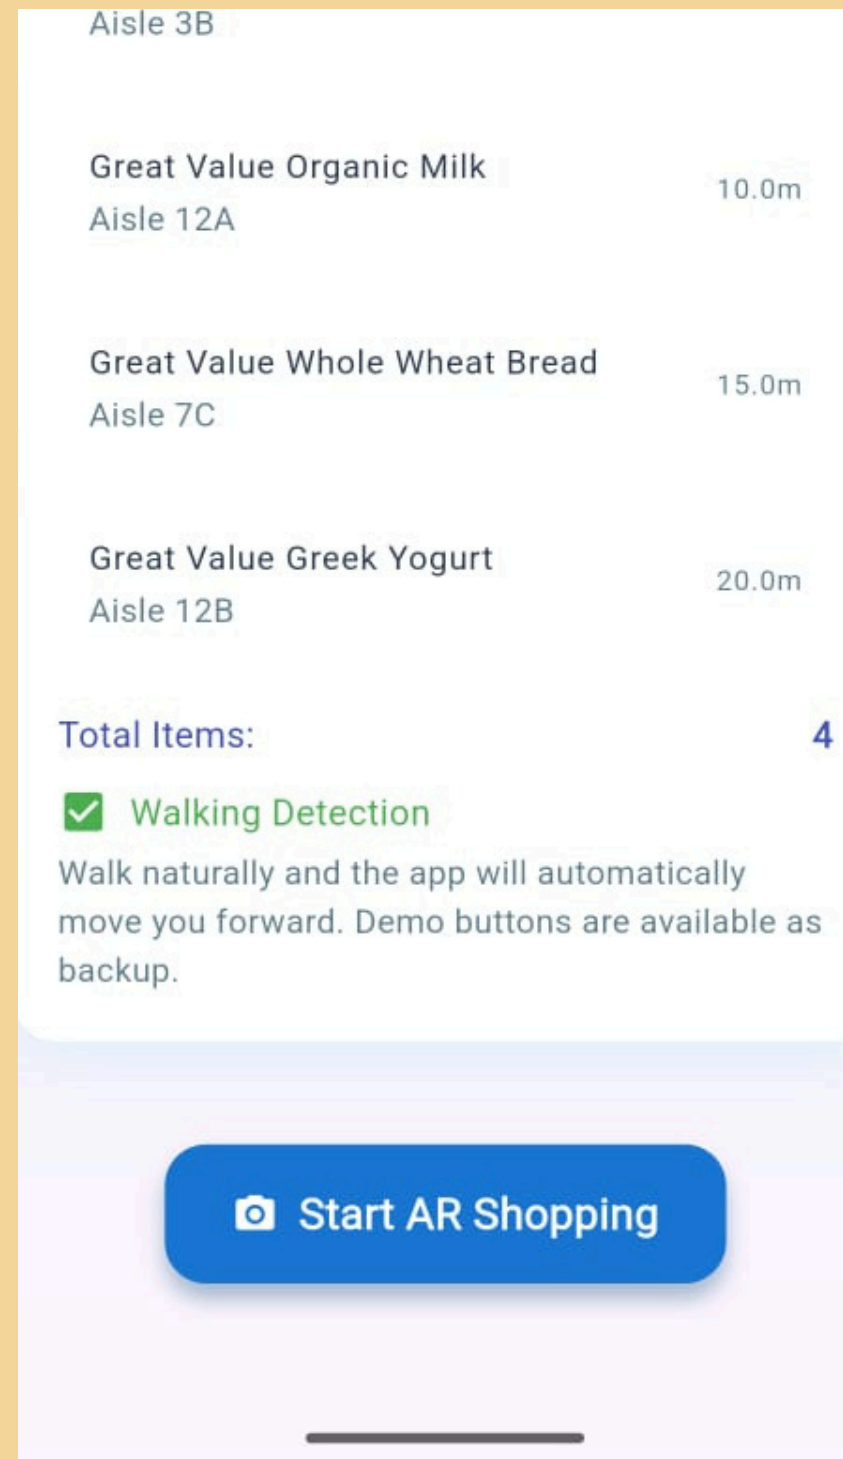

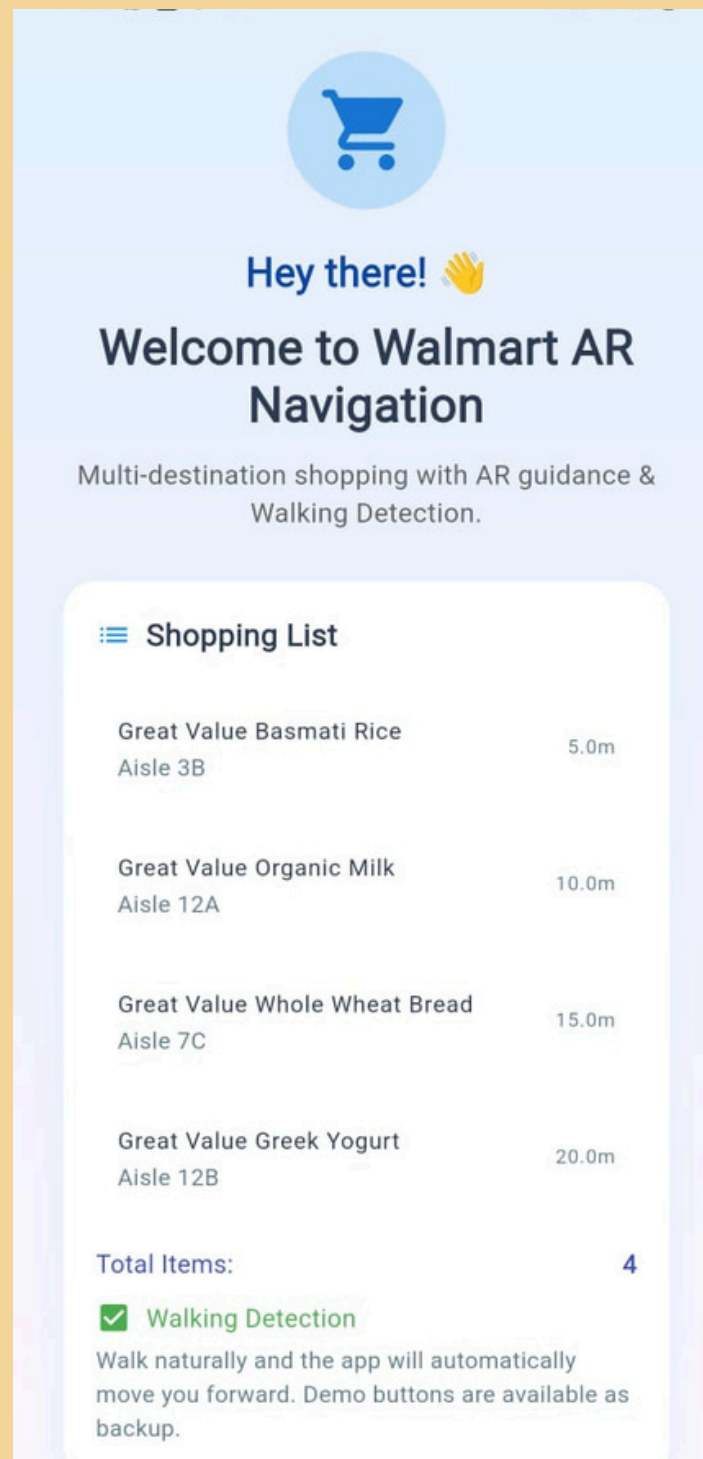

- Barcode Scanner
- Real-time Cart Updates
- AI Recommendation Engine
- Multi-payment Integration
- AR Navigation Trigger

IMPLEMENTATION

IMPLEMENTATION

BUSINESS IMPACT

•Customer Benefits:

- 60% reduction in checkout time
- 3x faster navigation
- Personalized shopping
- Real-time discounts

•Store Benefits:

- Increased sales
- Reduced checkout staff
- Digital ecosystem integration
- Inventory analytics

CONCLUSION

Walmart Smart Cart with AR Navigation represents the future of retail shopping:

- ✓ **Eliminates checkout queues**
- ✓ **Enhances customer experience**
- ✓ **Increases store efficiency**
- ✓ **Drives revenue growth**
- ✓ **Sets new industry standard**

THANK YOU
